

DROPLETS collection

Design by Claesson Koivisto Rune

Collection of benches and side tables with a light and elegant aesthetic. A minimalist design but with a presence that impacts the environment. The designers, the Claesson Koivisto Rune, were inspired by the shapes that droplets of water make when they land on a surface. The different models allow endless combinations that make this collection a set perfectly adaptable to common spaces, retail and hotels.

The main structure of the collection is birch plywood upholstered with two different foams to make it comfortable. The legs are 16 mm steel tube.
