

Cat. Tavoli, tables

The idea for Grapevine comes from vine branches and the desire to replicate their natural twist on a table base. The legs, all the same, are placed in the center of the table and rotated 90° in succession. The result is a sculptural design of great dynamism, which appears different according to the observer's point of view. Initially conceived in knotty walnut, with its intense colour, the base was then developed to include beech and in different metal finishes, achieving a versatility that makes it suitable for the most diverse contexts – from the most sophisticated to outdoor environments.
