CABLE TRAY - DESKS GEN

EXPLANATION OF USE OF THE CABLE TRAY

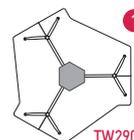

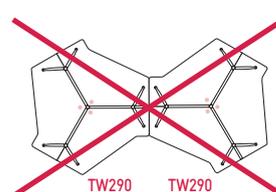

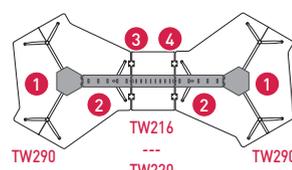

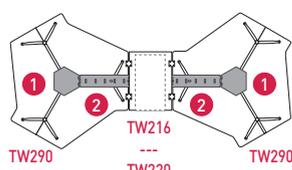

Use of cable tray on 120° Triple desk and Transition Top:

- To use electrification cable tray on desks of 120° Triple desk and Transition Top, request the desired/corresponding model, which is listed on the pricelist:
 - 120° Triple desk: 43,7 x 37,8 cm cable tray. Individual use in center of table for progression cable tray.
 - 120° Triple desk: 54,1 cm length x 17,5cm width progression cable tray, to connect with Transition Top cable tray.
 - 60cm Transition Top: 92,5 cm length x 17,5cm width cable tray for transition top.
 - 80cm Transition Top: 112,6 cm length x 17,5cm width cable tray for transition top.

A single central cable tray will be used for 1 x 120° triple table

We do not recommend this type of layouts due to the lack of space on adjoining workstations

For layouts with 2 or more 120° triple tables and extension tops **without pedestal without top**, we recommend to use a central cable tray on the triple desk. We recommend to order progressive cable trays on the triple desk to create a flowing cable tray together with the cable trays on the extension tops.

For layouts with 2 or more 120° triple tables and extension tops no supported by pedestals, we recommend to use a central cable tray (in the extension top) and progressive cable trays on the triple desk. Nevertheless if the extension tops are supported by pedestals, no cable trays can be used. To compensate, pedestals have a space at the top to allow cable management thought it.
