

RIA

Design Alberto Lievore

Rías are narrow coves along a coast which recall Norwegian fjords, owing to their silhouettes and poetic appearance. They are a land that welcomes and contains the sea and boats, and similarly, the curved and enveloping body of this chair, in die-cast and extruded aluminum, accommodates the comfort and well-being of the body. The design of *Ria* meets the need to live outdoors in different settings, situations and seasons, with a constant focus on practicality and comfort. *Ria*, light-weight and stackable, is perfect for both residential and contract settings: hotels, bars and restaurants, as well as lounge and break out areas.

Description

Dimensions

Characteristics

Dining armchair in painted aluminium

Design	Alberto Lievore 2019
Dimensions	53 x 60 x 76/45 h
Outdoor	yes
Structure	Die-cast and extruded aluminium
Caps	Polypropylene and thermoplastics elastomer
Paint finishes	Paint finish with polyester or polyurethane powders
Stackability	yes
Assembly screws	Stainless steel
Net weight	5.5 kg
Units per package	4 assembled
Packaging dimension and volume	73 x 69 x 96 h cm 0.483 m ³
Gross weight package	28 kg
Quality guarantee	2 years
Accessories	

634

Maintenance

Aluminium: Painted aluminum: Perform routine cleaning on painted aluminium with warm water and neutral detergent, using a soft cloth. Do not use aggressive, abrasive, acid- or alkali based products.

For the proper preservation of the product over time, we recommend you to wash the products with fresh water in order to eliminate all traces of corrosive agents.

The above-mentioned maintenance is especially recommended in maritime settings with high salinity
