GAZELLE collection

Design by Claesson Koivisto Rune

EN Light, ethereal and very chic. A collection of tables with a pure and stylized design. The main characteristic of this collection is the subtle but sculptural morphology of the elegant legs, its design, made of anodized aluminum, is the result of a digital, fluid and gradual morphing of the transformation between a circle and a triangle. An exercise in refined elegance that eliminates mass and leaves only the essentials. Available in various sizes, shapes and materials. The legs can be finished in polished anodized aluminum or epoxy paint.
