

Shells outdoor 945

design **martin ballendat**

The first shells were created 21 years ago, as the result of a collaboration between the furniture and knitwear industries. In this new version of Shells, the back is braided with nautical rope and the seat is upholstered with weatherproof covers, making it suitable for outdoor use. A variety of colors are available for the nautical ropes. The armchair and lounge legs are made in steel or Iroko wood, which is very durable due to its oil content, requires little maintenance, and has a natural resistance to pests. The pillows provide extra comfort. The elegant design makes it possible to use these models for a range of environments, both indoor and outdoor.
