

FULL MOON 908

design **mac stopa**

The top range of the Moon collection.

Full Moon is the latest model in the MOON collection, with its characteristic full backrest, which fits harmoniously into the armrests and the seat offering space for relaxation. Full moon is slightly wider and softer and is mainly designed for comfort. The shell is made of injected foam, padded with soft foam in the seat. The fabric or leather upholstery is embellished by the accurate stitching, a detail that, together with the new metal structure specially designed for this model, makes Full Moon a top-of-the-line product that looks good in any location.
