

Fleuron

Design: Constance Guisset, 2022

In the Fleuron chair by Constance Guisset the rationality of the design, based on the idea of a buttress that reinforces a wall, meets the softness of a curved line. The chair stands out for the crafting of the back, where the harmonious graft between structure and the back is emphasized by the contrast of color and finish. The chair is available in an all-wood version or a comfortably padded variation.
