## Technical Profile

### WHAT IS LINK?

The new trends in office design suggest combining privacy with open and collaborative offices, where creativity and communication flow in a natural way. This evolution in the way of understanding work environments lead us to the need to adapt the furniture so that it is flexible and versatile

With this aim, the studio ITEM designworks designed LINK, a modular system which creates and configures spaces of different heights that enables endless design possibilities to adapt work spaces to every need.

‘LINK enables you to create new spaces within offices and change them swiftly. It is a light, different program with personality. It works to complement and act as a transition between more individual areas of the office and other more open and collective places. To do this and by means of accessories that make it more operative and dynamic, LINK can combine modular sofas, operative desks and other accessories which expand the possibilities within the office, with the aim to stimulate efficiency of people through comfort and change.’ says Javier Cuñado, designer of ITEM designworks.

### WHAT LINK IS COMPOSED OF?

#### PANELS

Link PANELS are a modular system for creating spaces from panels of 130 and 170 cm height, with widths of 69, 80 and 102cm. The panels are clad in upholstery in different finishes. The simultaneous composition of panels allows great configuration possibilities.

#### JOINTS

The joint system consists of two elements. A superior joint piece and a lower joint piece which also incorporates a leveler. The joints are made of cast aluminum with epoxy paint in black. The joint system is designed to high strength and durability.

#### TABLES

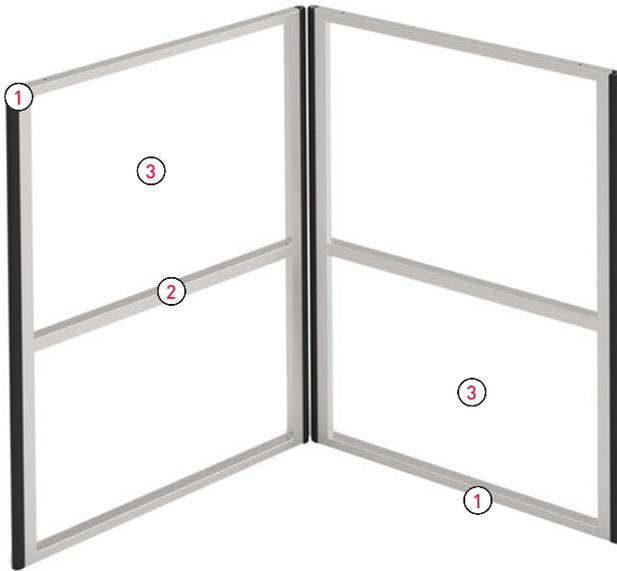

The tables, made of melamine board 25mm thickness to configure modulations jobs in both 90 and 120 °. The tables incorporate standard height adjustment system, with a minimum height of 74 cm and 82 cm, divided in 5 positions. In addition, all tables incorporate the new access to wiring “push latch” that allows access to more quickly and conveniently.

#### ACCESSORIES

These are made of folded 1.5 mm steel, finished in epoxy paint, textured white with a unique design, optional accessories, allowing higher performance and provides comfort in the workplace.

## 1. LINK PANELS

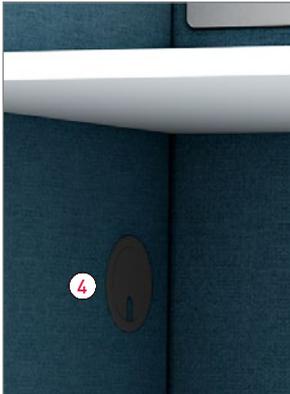

### ■ DESCRIPTION

Metal structure, on which are placed sound-absorbing panels

There are 4 types of panels:

- Finished or extended panel without placement of the table.
- Panel for placement of 1-sided table.
- Panel for placement of 2-sided table with grommets.
- Panel with height change.

### ■ TECHNICAL CHARACTERISTICS

- ① Steel perimeter structure.
- ② Central structure made of steel for elements anchored to the height of the table
- ③ Placement area of absorbing panels 30 mm thick.
- ④ Circular grommets Ø80 mm with access on both sides of the panel.
- ⑤ Cover upholstered in different finishes (See finishes card).

End and growth modules 130 cm high

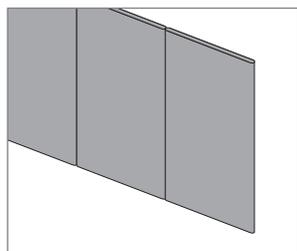

**LINK PANELS - INDEPENDENT MODULES**

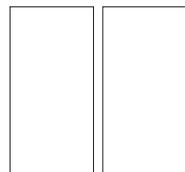

Independent Modules - 170 cm high

**LINK TYPE PANELS**

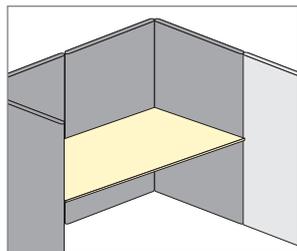

Used icon:

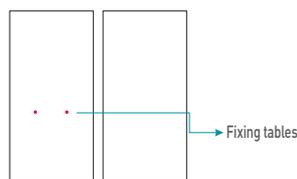

**PANELS WITHOUT ANCHORAGE SYSTEM OF THE TABLE**

Panels that enable the system of anchoring tables from none of its two sides. Available:  
- Growth or end panels in 130 cm height.

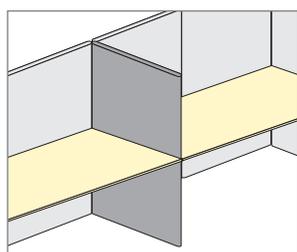

Used icon:

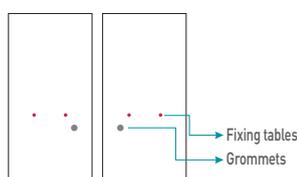

**PANELS WITH THE PLACEMENT OF THE TABLE ON ONE SIDE**

Panels that enable the system of anchoring tables on one side. The other side doesn't have the anchorage system.  
- Growth or end panels in 130 cm height.

Used icon:

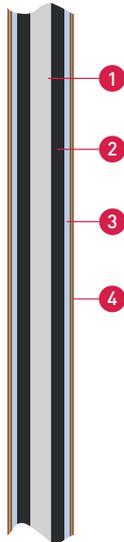

**PANELS WITH THE PLACEMENT OF THE TABLE ON TWO SIDES**

Panels that enable the system of anchoring tables on two sides  
- Growth or end panels in 130 cm height.

FEATURES

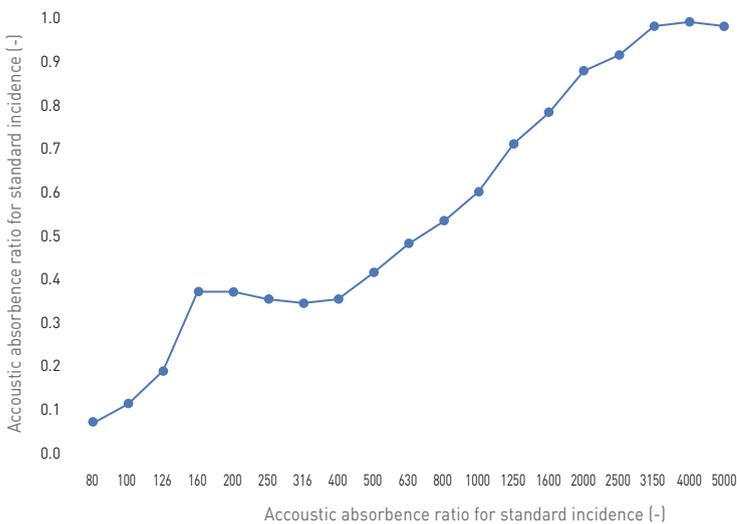

**LONGO AND LINK ACCOUSTIC SCREENS**

- ① 10 mm thick Chipboard
- ② Foam thickness e= 10 mm and 60 Kg/m3 density
- ③ Fabric foam 30mm thick and 20kg/m3 density
- ④ Different fabrics available glued using water glue.  
 - Optional acoustic or fire resistant fabrics for projects.

 Extreme end Pack - 1 module  
 End trim for workstations layouts (hexagonal or straight workstations)

**LK71**  
 End pack with 180° rotation - 2 modules

### 3. WORK DESKS FOR LINK

#### TABLES

Melamine of 90 and 120 gr. / M2, on chipboard made from certified PEFC 25 mm thickness. PVC edges 2mm thickness, applied with a hot melt glue and rounded R = 2 mm. With high durability and 100% recyclable.

#### HEIGHT REGULATION

The LINK tables incorporates as standard a system which adjusts mechanical height. It allows the modification of the height of a table from 74 cm to 82 cm in 5 intervals. The system is anchored at 4 points which ensures maximum stability and resistance. The possibility of carrying out a fixed anchorage system for projects exists, please consult with the Commercial Department.

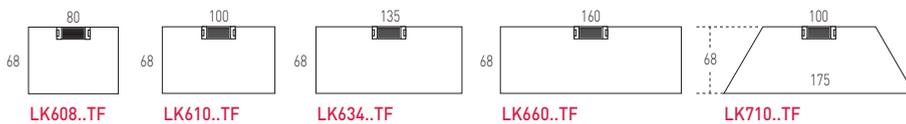

#### CABLING ACCESS "T"

Access system of cabling with an opening system. "Push-Latch" incorporated as standard on all surfaces. Made from White or Black ABS, it facilitates cable management channels using electrification. It also incorporates an "Anti Dust" system that prevents the accumulation of dust in the wiring. There is the possibility of using other cabling access systems for projects, please consult with the Commercial Department.

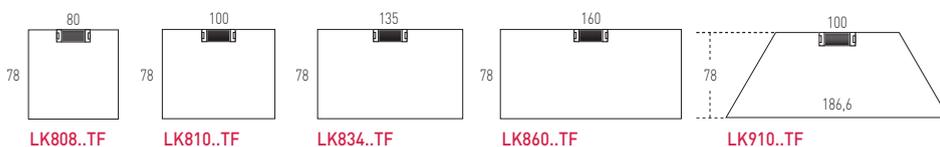

### TABLES FOR LINK CONFIGURATIONS

The work surfaces are used with **front panels** of 69, 80 and 102 cm. long and with **side panels** of 80 and 102 cm. long.

#### Work surfaces for the use of Link with a height adjustment system - Width 68 cm

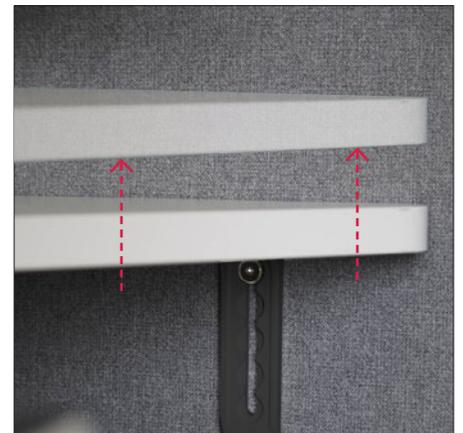

#### Work surfaces for the use of Link with a height adjustment system - Width 78 cm

### HEIGHT ADJUSTMENT

Min height. 74 cm and max 82 cm - 5 intervals

## 4. OPTIONAL ACCESSORIES FOR LINK

Made from 2 mm folded steel, finished in white epoxy paint, textured and with a unique design, optional accessories, which provide greater benefits to the workplace.
