Comfort and technology for healthier work

Power, designed by Javier Cuñado from ITEM Designworks, is an office table system that combines design and technology to create versatile and elevating operating positions that promote mobility in the workplace.

Made with high-quality materials, its structure conceals great solidity while giving the product a light and functional aesthetic. The central column that supports the table improves the flow of movement around it, creating more dynamic and active spaces.

Power - defined by a single central column - Serie 300, with a square pedestal base and larger surfaces, is suitable for more collaborative and managerial environments.

EVOLUTION AT WORK FOR A HEALTHY AND PRODUCTIVE LIFE

Power system efficiently solves the needs of today's workspaces: individual and multiple workstations, desks with integrated storage, media's room or executive and meeting tables.

LARGE CONFERENCE TABLES

Power stands out due to its large sizes in both managerial and meeting desks. In addition, Power also offers 140x140 cm, 160x160 cm and up to 200x120 cm desks that can be fixed or height adjustable, in a wide range of finishes. Its recessed structure provides a better functionality. The die-cast aluminium central cable access is easily accessible from any angle around the table.

MEDIA TABLES

AVAILABLE IN h74 cm and h100 cm

Media tables integrate naturally new technologies with furniture. Table is made of hardwood materials, with large dimensions and a trapezoidal shape. Its design allows all users to be connected; the present and the online ones. This version of Power incorporates a panel to hold the TV screen with central cable management that facilitates the connection of all devices. The table has an extruded aluminium profile and the surfaces are available with non-fingerprint treatment in: chestnut, lime oak, black and white MFC.
