How to code a reference

- 1

At the beginning of the coding and price tables of our price list, you will find the available models and their prices, as well as the basic reference of the product.
- 2

The system is designed to code vertically, adding desired components to the product by selecting the reference digits. Creating a correlation that will form the final order reference.
- 3

The finishes of arms, bases, optional complements, supports and upholstery will be shown in different colors so that the location of their reference and price is intuitive.
- 4

At the end of each table we will have legends or informative notes about the product being offered. Please read carefully to avoid confusion or mistakes when ordering.
- 5

This catalog has an interactive menu that will facilitate the user's navigation. It is located at the bottom of each page and from it you can go to the index, go back or even navigate within the family and the product displayed.

Example of reference configuration for an order

Arkitek Storage · Model 2 holes		QY1
Measures		100
STRUCTURE FINISHED		↓
Aluminium · White		00
STORAGE FINISHED		↓
BODY · MFC White / DOOR · MFC White		M00M00

FINAL CONFIGURATION REFERENCE

AKM11 1005 00 M00M00

* The final cost of the module will be obtained starting from the established base price and adding to it the cost of the different complements that are added to it.

	Required option for reference configuration. No cost increase.		Combination not available
