TNK 500

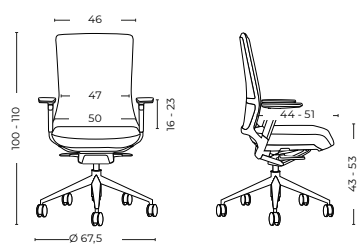

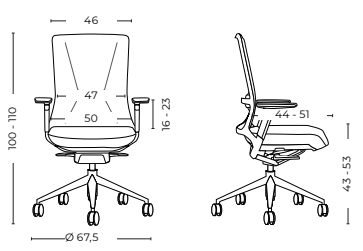

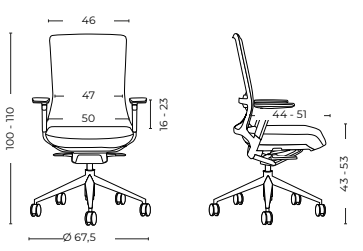

Manufacturer: Actiu, Spain

Technical specifications

Model	**Tnk 500** · Serie 20	**Tnk 500** · Serie 50	**Tnk 500** · Serie 30
Backrest	Moulded flexible foam PU flexible (80-90kg/m3) over steel metal frame Ø 6 x 1,5 mm thickness. Upholstered.	**Tex fabric:** Foamized fabric composed of 5 mm polyurethane foam + Upholstery T. 10 mm polyurethane foam + Upholstery D, M or P.	**Breathable technical fabric:** High tenacity elastic technical fabric
Backrest frame	Back rest aluminium frame.		
Lumbar support		Lumbar support adjustment, which is activated by moving the control in the back of th chair, up or down. The elastic mesh of the back is automatically adapted to each user releasing pressure in those points.	
Headrest	Made of flexible foam 90-100kg/m3, (38,5 x 21 cm) upholstered in different finishes.		
2D Arms	2D adjustable arm. Aluminium cane. Height adjustable arms and anti-panic system		
Seat	Seat injected with flexible PUR foam of 55-60kg/m3 density. Upholstered in easy to clean fabric.		
Oscillating seat	360° adaptive tilting seat that adaptively follows the user's movement. Allows dynamic negative angle.		
ACS System	ACS (Air Comfort System) technology that promotes adaptive compression and decompression of the foam.		
Flexible sheets	Flexible sheets that reduce pressure on the muscles and achieve a correct sitting position for the user.		
Depth	Rack and pinion mechanism allowing locking in 8 positions. **Total range of displacement:** 7 cm.		
Syncro mechanism	Synchronized backrest tilting system in 4 positions from 0° to 20°. Tension adjustment that applies a force of 50 to 120kg to the backrest.		
Gas lift	Seat+backrest lifting by means of a gas pump. **Elevation range:** from 44 to 54 cm.		
Bases	5-spoke base Ø 67.5 cm, made of polyamide (black) or aluminum (white, black, aluminized and polished).		
Support	Ø 6 cm black standard castors with Teflon treads. **Optional:** Self-braking hollow wheel, self-braking, anti-static and polypropylene plugs.		
Dimensions	**Overall dimensions:** Height: 100 a 110 cm Width: 67,5 cm Depth: 67,5 cm **Seat dimensions:** Height: 44 a 54 cm Width: 50 cm Depth: 44 a 51 cm	**Overall dimensions:** Height: 100 a 110 cm Width: 67,5 cm Depth: 67,5 cm **Seat dimensions:** Height: 44 a 54 cm Width: 50 cm Depth: 44 a 51 cm	**Overall dimensions:** Height: 100 a 110 cm Width: 67,5 cm Depth: 67,5 cm **Seat dimensions:** Height: 44 a 54 cm Width: 50 cm Depth: 44 a 51 cm
			

TNK 500

Manufacturer: Actiu, Spain

Functionalities

Types of mechanism

Synchro mechanism with limiter and gas lift

1

Seat height

The seat height adjustment is made by means of a gas pump. The mechanism is operated by pushing up the handle located on the right side, in the sitting position, under the seat.

2 **4 positions**

Syncro self-weighting mechanism

Tnk 500 has 4 defined backrest positions from the locking position to the maximum position of 20°. A sensitive adjustment device is incorporated under the seat that allows the tension to be adjusted to personalise the user's comfort by turning the device to achieve a greater or lesser tension.

Video operation

Included functionalities

Airflow confort system

The seat has been designed with air chambers to improve comfort, flexibility and pressure distribution for any user. Covered with flexible PR injected foam of 55-60 kg/m3 density.

Seat travel (TRASLA)

The horizontal displacement of the seat allows adjusting the distance of the seat from the backrest, so that it adapts to users of different anthropometric characteristics. **The seat can be locked in 8 positions.** The auto return system moves the seat to the initial position without exerting pressure on the seat.

Arms 2D

Arm height adjustment

It is operated by pressing the button located under the armrest. **7 locking positions are available.**

Arms 2D

360° Swivel arm system (Anti-panic)

360° pivoting system allows the arm rest to turn horizontally. 360° Swivel arm movement allowing horizontal rotation of arm rests. Rotation functions:
- nti panic solution.
- btaining alternative position to approximate the chair to the work surface.

Arms 2D / White

Arms 2D / Black

Arms 2D / Polished

Arms 2D / Bronze

Arms 2D / Copper

Arms 2D / Titanium

TNK 500

Manufacturer: Actiu, Spain

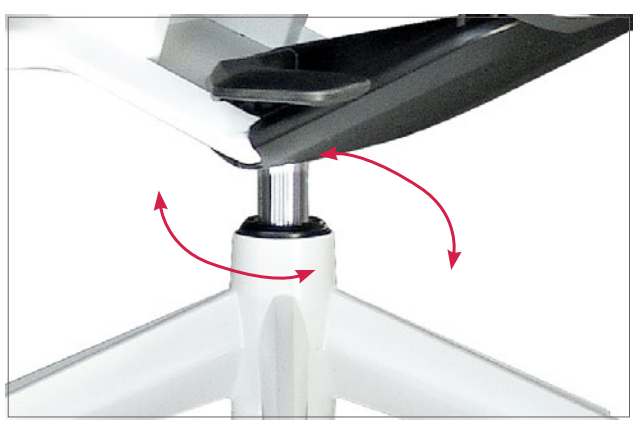

Optional functionalities

Headboard / Upholstered back
Any TNK 500 model can be complemented with a headrest made of flexible foam 90-100kg/m3, (38,5 x 21 cm) upholstered in different finishes.

Lumbar adjustment
TNK 500 has a lumbar support adjustment, which is activated by moving the control in the back of th chair, up or down. The elastic mesh of the back is automatically adapted to each user releasing pressure in those points.

The self-return, auto-lift cylinder swivels 360
swivels 360 degree in both directions, height adjustable when seated and returns the seat automatically to the original position when vacated. The direction and height of the chair are always the same when vacated.

Castors and caps

Standard castors

All chairs include as standard soft castors with silent teflon tread which allows an easy and light movement of the chair in black finish. Diameter 6 cm.

Auto-brake castors

This system provides security according to standard EN 12529 as it avoids accidental movement of the chair. While sat on the chair, it moves easily.

Optional safety castors, with self-braking system, which prevent the chair from unintentionally rolling away. Available in different finishes. The safety brake according to standard EN 12529 for office chairs requires that when the chair is unloaded, i.e. before the user sits down, the castors are slightly braked and do not give the chair the possibility of sliding when the user sits down. It includes an easy system to reduce and/or deactivate the braking force, and is mainly considered as an aesthetic option.

Antistatic castors

Electrostatic dissipative castors that are designed to allow static electricity to flow through the tread and dissipate safely into the ground.

Caps

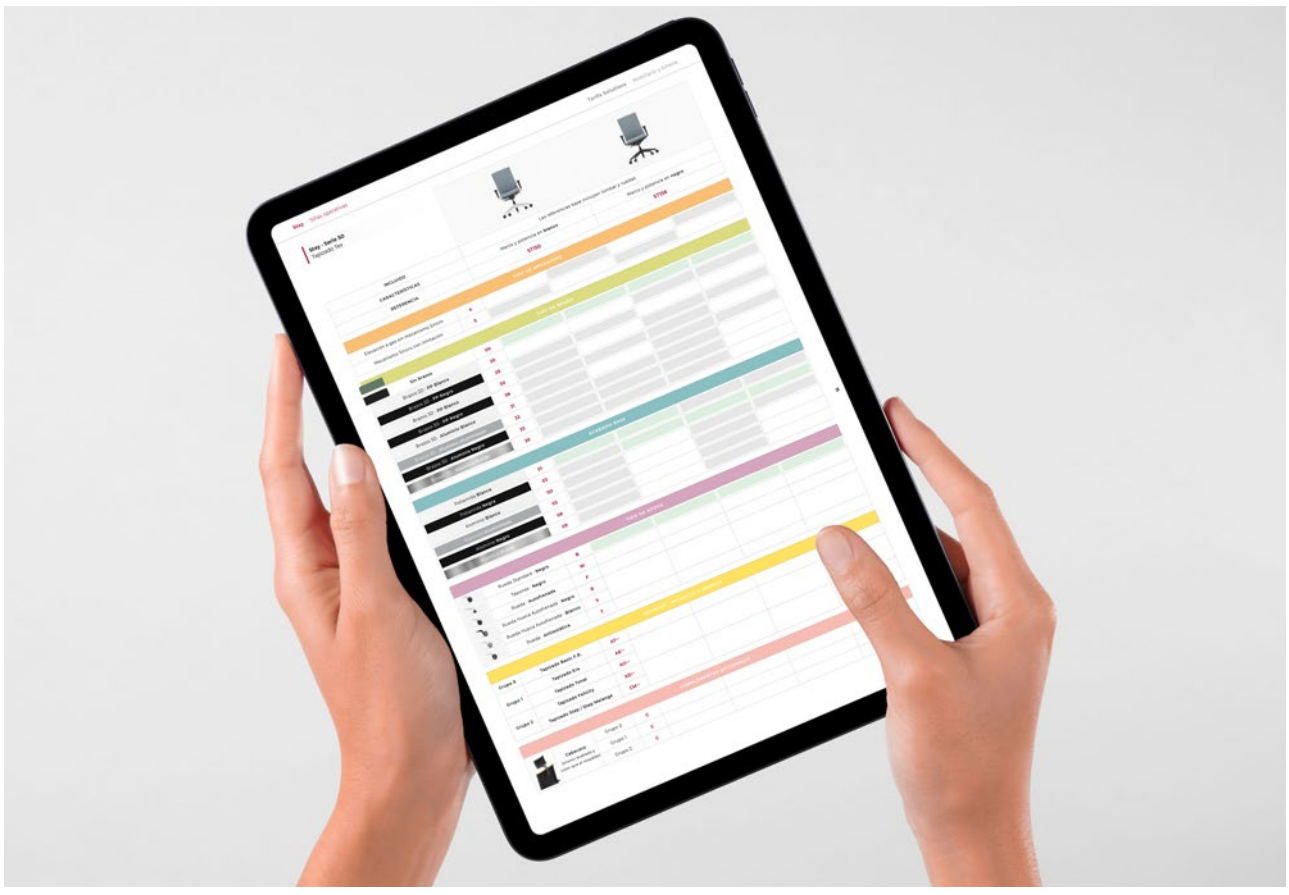

Black Polypropylene (PP) caps with antiskid rubber.

TNK 500

Manufacturer: Actiu, Spain

How to code a reference correctly

1. At the beginning of the coding and price tables of our price list, you will find the available models and their prices, as well as the basic reference of the product.

2. The system is designed to code vertically, adding desired components to the product by selecting the reference digits. Creating a correlation that will form the final order reference.

3. The finishes of arms, bases, optional complements, supports and upholstery will be shown in different colors so that the location of their reference and price is intuitive.

4. At the end of each table we will have legends or informative notes about the product being offered. Please read carefully to avoid confusion or mistakes when ordering.

5. This catalog has an interactive menu that will facilitate the user's navigation. It is located at the bottom of each page and from it you can go to the index, go back or even navigate within the family and the product displayed.

Example of reference configuration for an order
