IN OUR JOURNEY BETEEN PAST AND FUTURE WE MET A PLESANT PLACE OF CONTRADICTIONS CALLED IT TAB

TS

cierre1972

A modular sofa, with which different compositions can be created, by combining the available seating units. The composition can then be enriched with back- and arm-rests and coffee tables, fitted to the sides of the sofa by a suitable metal bracket, painted matt in 7 RAL colours or in 3 chromed finishes Black, Polished and Gold. As to the coffee tables, the choice is between 3 models and 5 different ceramic finishes. The backrest mechanism changes the depth of the seat, adapting it to our desire for comfort. An important detail: on the corners of the seat and back units there is a “bugia” that can be in contrasted colours or materials, compared to the main covering.

Its style is an idea of linear elegance, without glitz. Its environment is a city scenery, surrounded by an almost ethnic atmosphere. And space finds its balance in a revolution, because it has no definite geometric constraints, except those desired by our well-being. Tab decomposes, multiplies or mirrors itself. Welcoming lines, soft and clean, which find their coherence in an asymmetrical frame, so unique, each time original.

I was a craftsman,
right before others saw that I was an artist.

The passion for details is hidden inside a “bugia”.
